

# COYOTE II

## *Turf Type Tall Fescue*

**Uses:** NEW RELEASE from Scotts/Landmark Seed with initial limited commercial harvest Summer 2004. Experimental designation K01-80015.

COYOTE II is an excellent choice for sports fields, golf course roughs, commercial turf, home lawns, erosion control, roadsides and airports. This is the most popular turf in the transition zone, and in other areas that require a durable turf.

COYOTE II Tall Fescue is a good choice for athletic fields throughout the transition zone as well as in sandy, un-irrigated situations in the Southern half of the cool season zone where conditions are poor for standard Kentucky bluegrass and Perennial Ryegrass. Use in full sun to moderate shade.

**Geographical Adaptation:** All areas of adaptation for Turf Type tall fescue with excellent performance compared to other commercial varieties in the hot and humid Southern, Mid-Atlantic and Transition Zone.

**Features:** A top 10 2003 NTEP performer in overall turfgrass quality. Coyote II is the leader in the new generation of turf type fescues with exceptional dark color and the finest texture rating out of 159 entries. One of the best performers in Mid Atlantic, Transition and Southern Region where tall fescue is dominant species for Landscape Turf. Excellent for mixing with Kentucky Bluegrass and Perennial Ryegrass because of dark color and fine texture.

**Production Areas:** Washington, Oregon

**Rate:** Overseeding : 3–6 lbs/1,000 Sq. Ft.  
New Seeding: 8–10 lbs/1,000 Sq. Ft.
